NDVI mapa se prikazuje prema inerciji.

Ako odaberete polje, istorijski podaci za lokaciju će se prikazati na grafikonu ispod

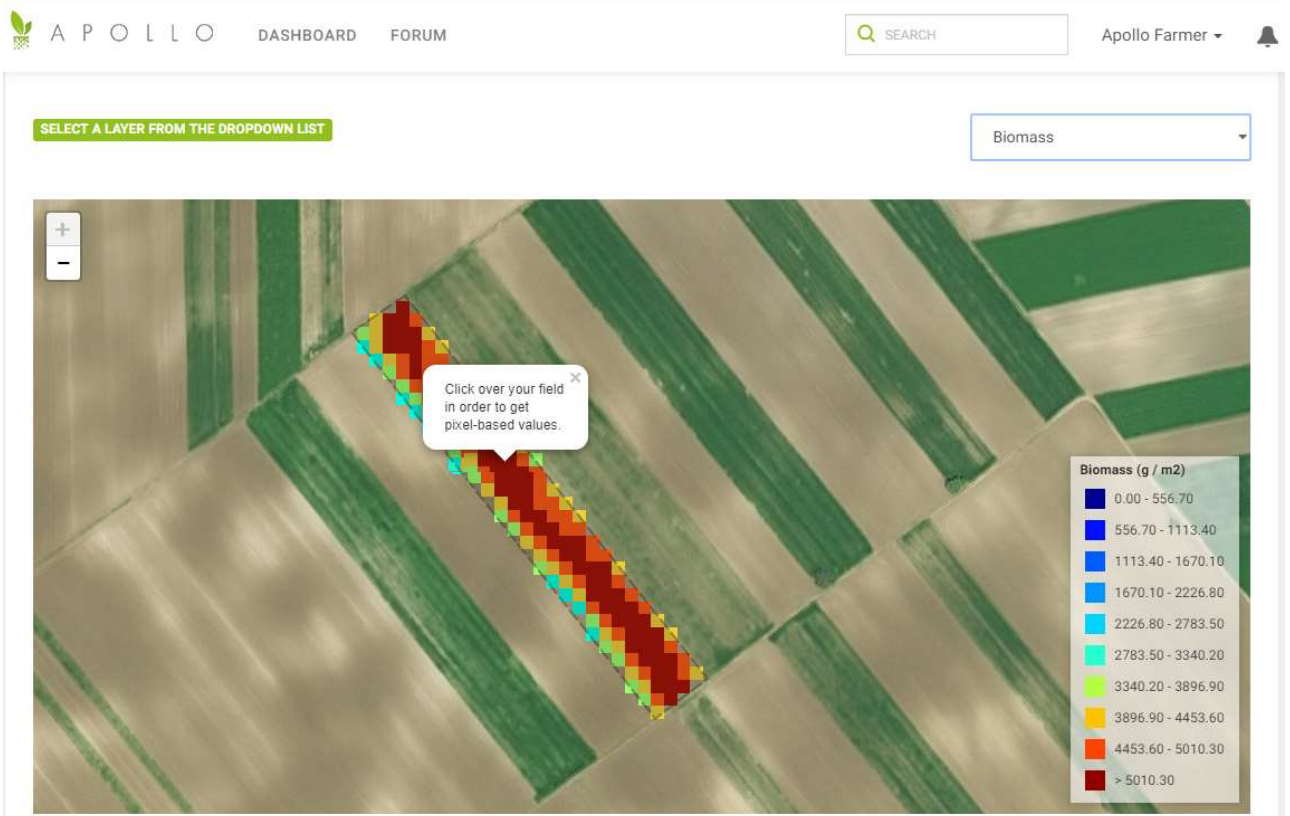

Odabirom datuma na kalendaru, mapa će se promeniti da prikaže parametar vegetacije (NDVI, biomasa, CI indeks) za određeni datum.

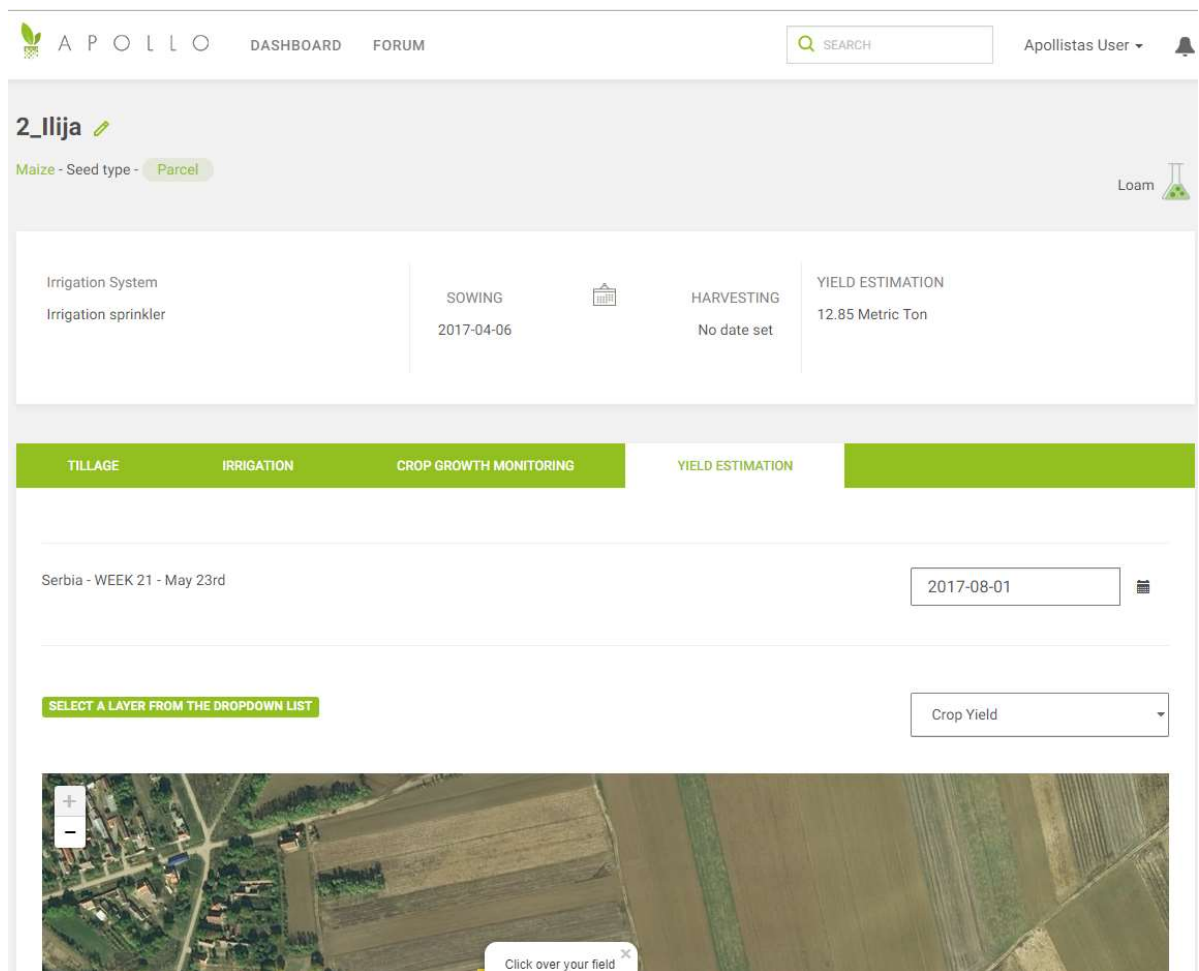

U padajućem meniju, izaberite drugi parametar (LAI, Chlorophyll index, biomass) da se prikaže.

Selektovan parametar je prikazan na mapi

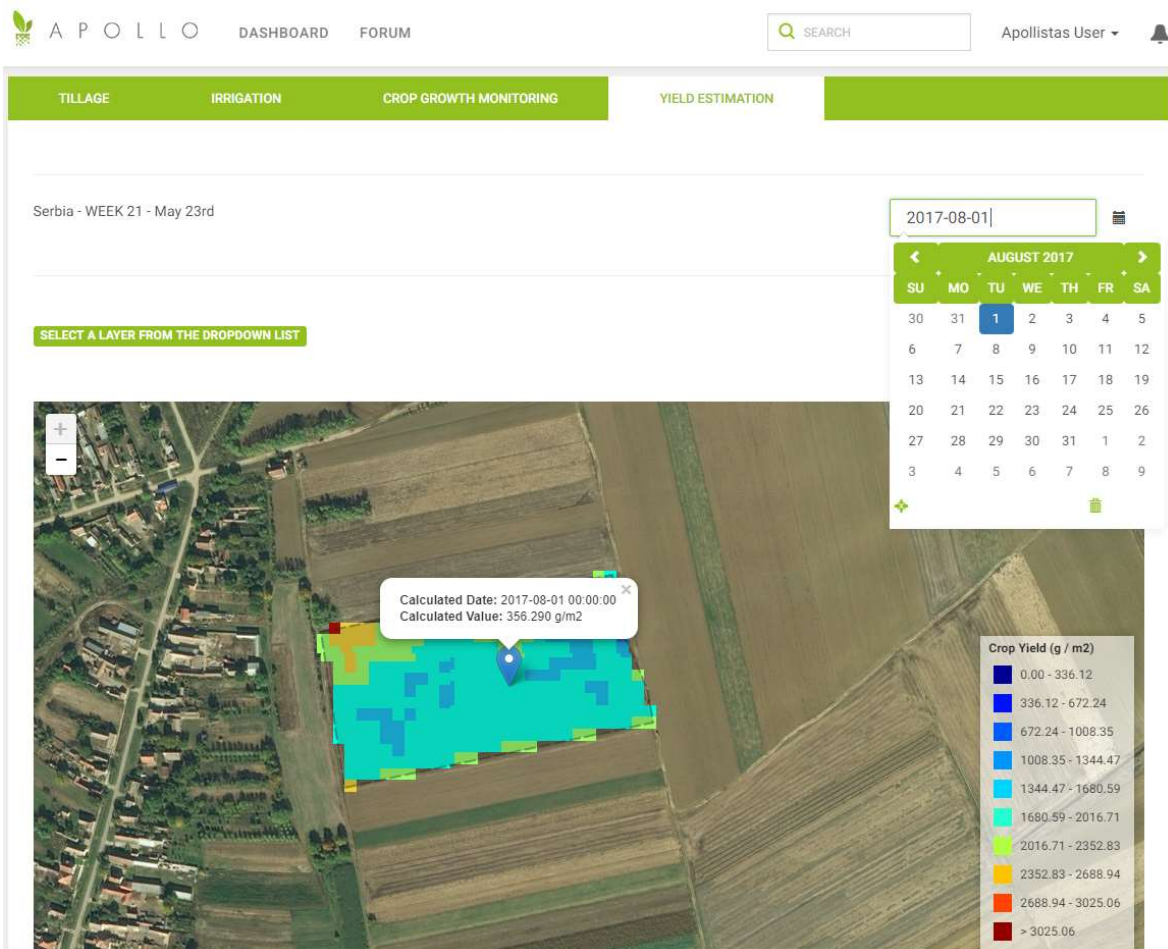

Prebacite na [Uslugu procene prinosa](#) klikom na dugme PROCENE PRINOSA u meniju usluga.

Procena prinosa za celo polje je prikazana u Metričkim Tonama. Varijacije prinosa u okviru polja su prikazane na mapi prinosa useva, koja se prikazuje po inerciji.

Istorijski podaci za procenu prinosa se mogu prikazati odabirom datuma u kalendaru.

U padajućem meniju, odaberite Crop residues da bi vam se prikazala mapa ostataka
